### Overview

Geographers use a set of skills that include: Observation, Speculation, Analysis and Evaluation (OSAE). The first step of OSAE comes from visual observations.

Another aspect of geography is the study of world cultures. Culture is defined as a way of life of a group of people. Culture includes language, arts and
crafts, customs, dress, religion, forms of amusement, commonly found institutions, technology, and signs of wealth and beauty within a group of people.

**Purpose**

In this lesson, students learn characteristics of culture by viewing images. Students will then create a photo essay reflecting on what they have observed and researched about a culture.

**Materials**

- NGS Video Culture—(15 min) [https://www.youtube.com/watch?v=G0zc8DPjIGA](https://www.youtube.com/watch?v=G0zc8DPjIGA)
- Mind Map and Key
- Elements of Culture—even more characteristics of culture
- Observing the Characteristics Worksheet
- Iceberg Model of Culture
- Observing Cultures through Images power point (no slide titles) for Session One
- Observing Cultures through Images power point (with slide titles) for Session Two
- Photo Essay Assignment
- 40 Portraits by Steve McCurry or 40 photos of people from various cultures—cut out and laminated
- List of countries represented by the people in the photos
- List of countries to research (eliminating the U.S.)

**Objectives**

The student will be able to:

1. identify common characteristics of culture.
2. analyze different ways to view places.
3. create a photo essay using technology.

**Procedures**

There are two ways to use this lesson based on if you can project the video produced by National Geographic and now on YouTube called Culture—Tapestry of Life. The video is really ideal for this lesson. However an option is to use the power point of images made for Session One.

**SESSION ONE**

1. Pass out the Mind Map.
2. Introduce the lesson with the definition of culture and have the students watch the video: (Culture-Tapestry of Life) or the power point. Use the photos as prompts for What characteristic(s) of culture do these images portray? Let the students raise hands and guess. As the students correctly identify the characteristics of culture (clothing, foods, language, etc.), record the characteristics on the board while the students record the elements on their mind map.
3. Now display the image at the end of the power point or use the image included in the student files called Iceberg Model of Culture. Have students look at the characteristics they have written and then decide if they are above or below the water level. Discuss how some elements are visible; others are not. The visible elements of culture can be easily observed; however, other elements may take learning about and observing a culture for a long period of time.
4. Pass out the laminated photos from the Steve McCurry book or photos of people from other sources
5. Have the students complete the Observing the Characteristics of Culture worksheet.
6. Closure: Select several students to share their observations with the class by having them hold up their photo and share 2-3 observations about their person and his/her culture.

**SESSION TWO and THREE**

1. Have students find a partner and then “draw out of the hat” a country to research.
2. Explain the writing assignment and the scoring guide.
3. Show the lesson power point with titles to the slides so they can see a model of what to create. Note: Most of these slides have 4 or more examples. To decrease the time the photo essay will take, cut down the number of images needed on a slide to 1 or 2 unless there is great variety within a country. For example: it would give people the wrong impression to only list 1 religion for the United States. But you could do favorite food or music if you have research to back this up.
4. Take students to the computer lab to create their photo essay. If time allows, have students share their slide shows with the class.
5. Closure: Have students reflect on the characteristics of culture that they portrayed in the slide show. Were they “above or below the water line?” Why?

**ARIZONA GEOGRAPHIC ALLIANCE**
Assessment

Students’ Observing the Characteristics Worksheet and mind maps can be graded for completeness. Mastery is 90% or higher.

The Photo Essay Assignment can be graded using the scoring guide provided. Mastery will be considered 80% or higher.

Extensions

While this lesson deals with cultures outside the U.S., the same characteristics can be applied to historical times in American history. Have students identify colonial or pre-Civil war culture traits, etc.

Included with this lesson are several scavenger hunts.

- Using Your Geographic Lens to View the Landscape (Can be used at school.)
- Using Your Geographic Lens to View the Urban Landscape (Can be used in community.)
- Using Your Geographic Lens to Document Culture and Cultural Diffusion (Can be used at museums such as the Musical Instrument Museum.)

There is also a PowerPoint on Cultural Diffusion.
