

### Renewable Energy

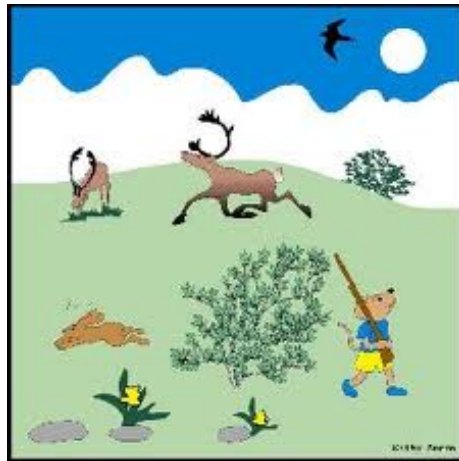

### Non-Renewable Energy

**non-renewable resource:** Natural resources that cannot be replaced or grown at a rate to meet demand (fossil fuels, metals, and minerals)

<http://allanallstarvocablary.blogspot.com>

**renewable resource:** any natural resource that can be replaced naturally with the passage of time (forests, air, animals)

<http://alaska.fws.gov>

**renewable energy:** energy that can be supplied continually (wind, solar power, geothermal, hydropower)

<http://www.sbc-technologies.com/>

**sailboat:** boat that uses the wind to make it move

<http://travelandtell.wordpress.com/>

**parts of a boat** (show as a picture): mast, deck, keel, rudder, tiller, boom, sails

<http://lyrabermoda.wordpress.com/>

**deceased:** no longer alive

<http://www.colourbox.com/>

**solar:** relating to the sun
