

Instructions for Completing Student Map Work

1. While listening to the story a second time, students will locate and highlight in yellow the states of Massachusetts, Pennsylvania, Ohio, and Indiana on the United States map.
2. Have students put an apple sticker on the state of Massachusetts.
3. Have students locate the compass rose and scale on the map key.
4. Then have them draw a line with a pencil from Massachusetts to Indiana.
5. After you model how to measure using the scale, have students work with their partner to figure out how many miles Johnny Appleseed walked.
6. Partners then decide in which direction Johnny Appleseed walked from Massachusetts to Indiana.
7. Partners will then complete the Johnny Appleseed assessment together.
