

MAP FACT INFORMATION SHEET

A road map shows the boundaries for towns, cities, countries, and states. Road maps show how people can travel between these locations.

A physical map shows physical features on the earth's surface such as mountains, plains, rivers, oceans, deserts and forests. Physical maps are used for locating these places.

A political map shows boundary lines around countries and states. Political maps are used for seeing the size and location of these areas.

A population map shows where and how many people are in an area. Population maps can be used to understand the changes in population and how to plan for civic and economic needs.

A city map shows the physical, political and road routes of a city as well as major attractions such as shopping malls, medical centers, civic buildings, and airports. City maps are useful for finding your way around a city.

An evacuation map shows an escape route from an area, building, or room that is to be left quickly during an emergency like a fire.
