

Student Work Sample for What a Map!

Map Presentation

This is an evacuation map. It shows an escape route, an exit and an assembly area. You use an evacuation map to get out of a building or when you want to practice a fire drill. I have seen this map before at a lot of places. It is a great way to get out in case of a fire because everybody would know what to do and where to go. I think it is a great way to practice fire drills. I have seen this map everywhere.
