

Student Work Sample for Where is the Trail?

Wow! It was millions of years ago when Lewis and Clark took their journey. and it was only one year ago when I took mine. Even though we took our journey many years apart, we still have a lot of things in common.

Lewis and Clark went on a journey just like I did. We both took more than two people on our journey. Believe it or not we both took a dog and a baby! When we were on our trip, we both got many gifts from people that we meet.

Although we have many things in common, we also have many differences. When I took my journey, I rode in a plane and then a car. We also had store bought clothes that would last us a long time. Even though we had not been in the land before, other people had. We stayed in hotels and bought our food. Our journey only lasted two months.

Now Lewis and Clark's journey was a lot different. Their journey took two years, four months. That is two years and two months more than mine. When they stopped for the night, they stayed in a fort or Indian tribe's fort. Whenever they traveled they had to either walk, use a boat, or ride a horse. They did not have cars and planes like I did. Nobody other than Indians had ever been on the land. They had to make their own clothes and catch their own food. Lewis and Clark's journey was very different than mine but we both had a journey!
