Cpt. Jacques Y. Cousteau

Captain Cousteau, with physicist Emile Gagnan the co-inventor of the Aqua Lung, is the President and Chairman of the Board of the new U.S. Divers Co. For the last six years, Captain Cousteau, a former French Navy officer, has directed a series of oceanographic research expeditions aboard the "Calypso", famous floating marine laboratory, accompanied by the world's most experienced divers, geologists, biologists and underwater photographers. Jacques Cousteau brings a fresh, authoritative and dedicated approach to skin diving in America. Under his leadership U.S. Divers offers unmatched resources in experience, research and engineering facilities in the diving field.

THE FAMOUS AQUA-LUNG, SYMBOL OF SAFETY

SAFETY is the greatest single factor the diver demands in his underwater breathing equipment. Here are facts about the Aqua-Lung.

- The U.S. Navy uses the Aqua-Lung 10 to 1 over all other units combined.
- Hollywood has chosen Aqua-Lung exclusively for major motion picture productions.
- More Aqua-Lungs have been sold in the past 10 years than all other diving apparatus combined in a century.

LET'S LOOK AT THE RECORD

- After 11 years and millions of hours of diving time, Aqua-Lung has a record of **NOT ONE CASUALTY** due to mechanical failure.
- The tried and proven Aqua-Lung, the magic name for safety, quality and dependability, is the pivot around which the diving industry revolves.
- U.S. Divers new factory is dedicated exclusively to the manufacture and distribution of the Aqua-Lung and the finest diving equipment available anywhere.

AQUA-LUNG REGULATORS AND TANK BLOCKS FIT EVERY DIVER'S NEEDS—EVERY DIVER'S POCKETBOOK
