**SCIENCE**

**Core Ideas for Using Science**

U1: Scientists explain phenomena using evidence obtained from observations and or scientific investigations. Evidence may lead to developing models and or theories to make sense of phenomena. As new evidence is discovered, models and theories can be revised.

U2: The knowledge produced by science is used in engineering and technologies to solve problems and/or create products.
In Search of the Ninth

U3: Applications of science often have both positive and negative ethical, social, economic, and/or political implications.

SP4: Thinking within the discipline involves the ability to analyze relationships among causes and effects and to create and support arguments using relevant evidence.

Arizona English Language Proficiency Standards

Grade 2

Basic

Listening and Reading
Standard 1 By the end of each language proficiency level, an English learner can construct meaning from oral presentations and literary and informational text through grade appropriate listening, reading, and viewing.
B-1: ask and answer questions by using evidence from a text.
B-2: determine the central topic or message.

Speaking and Writing
Standard 3 By the end of each language proficiency level, an English learner can speak and write about grade appropriate complex literary and informational texts and topics.
B-1: deliver short oral presentations that include some details to develop a topic.

Standard 4 By the end of each language proficiency level, an English learner can construct grade appropriate oral and written claims and support them with reasoning and evidence.
B-1 express an opinion on a topic or text.
B-2: supply a reason that supports the opinion and is based on some textual evidence.

Listening, Speaking, Reading, and Writing
Standard 6 By the end of each language proficiency level, an English learner can participate in grade-appropriate oral and written exchanges of information, ideas, and analyses, responding to peer, audience, or reader comments and questions.
B-1: participate in discussions about familiar topics and texts.
B-3: use general academic and domain-specific words and phrases.

Overview

The ancient Roman army was composed of single men, over the age of 20, who were committed to serve in this army and remain unmarried for 25 years. These Roman soldiers were divided into approximately 30 legions. There were between 4,000 and 6,000 men in each legion. The legions fought together to defend and to expand the Roman Empire. Following Emperor Hadrian’s command,
In Search of the Ninth

one of these legions, the Ninth Legion, set off to fight in the northern part of what we now know as Great Britain. The Ninth Legion was never seen or heard from again.

Purpose

In this lesson students will investigate a mystery: What happened to the Ninth Legion? What clues could help us to find the legion or know its fate? Students will learn how forensic scientists record observations and analyze data to solve mysteries. This lesson includes strategies for diverse learners (ELLs).

Key Vocabulary

<table>
<thead>
<tr>
<th>term</th>
<th>definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>legion</td>
<td>a group of 4,000 to 6,000 Roman soldiers</td>
</tr>
<tr>
<td>legionary</td>
<td>a soldier who is a member of a legion</td>
</tr>
<tr>
<td>empire</td>
<td>a large area of land and people ruled by an emperor</td>
</tr>
<tr>
<td>emperor</td>
<td>the ruler of an empire.</td>
</tr>
<tr>
<td>forensics</td>
<td>the use of science to investigate something after it has happened</td>
</tr>
<tr>
<td>impression</td>
<td>a mark produced by pressure</td>
</tr>
<tr>
<td>interview</td>
<td>a meeting where a writer or reporter asks questions of one or more people</td>
</tr>
</tbody>

Materials

- Roman Legion Introduction [https://rome.mrdonn.org/romanlegion.html](https://rome.mrdonn.org/romanlegion.html)
- Vocabulary cards
- Vocabulary Test and Answer Key
- Fingerprinting investigation worksheet
- Transparent tape
- Sharpened pencils
- Scratch paper
- White cardstock sheets
- Markers
- Magnifying glass
- Footprints investigation worksheet
- Plaster of Paris
- Water
- Hair spray
- Teeth impressions investigation worksheet
- Styrofoam plate
- Scissors
- Thick chocolate
- Interviews investigation worksheet
- Ticket to Leave for Session One and Two
- Forensic Activities Written Opinion Scoring Guide
- Oral Presentation Scoring Guide

Objectives

The student will be able to:

1. describe how some aspects of ancient civilizations are different from today.
2. analyze the data obtained from a forensic investigation to draw conclusions.
3. construct an opinion based on evidence.
4. formulate questions to gain information.

Procedures

Prior to this lesson, the teacher should become familiar with the story of the Ninth Legion and its disappearance either through websites such as [https://www.historia.ro/sectiune/general/articol/the-enigma-of-the-ninth-legion](https://www.historia.ro/sectiune/general/articol/the-enigma-of-the-ninth-legion) or from reading the book, *The Eagle of the Ninth*, by Rosemary Sutcliff. For Session Two, it would be helpful to have classroom volunteers (older students or adults) to help with each of the groups conducting the forensic experiments.

SESSION ONE

Engage:

a. Introduce the lesson by telling students that they are going to be forensic scientists and solving a mystery. Explain the word “forensics” and place it on the word wall. Then tell them the story of the Ninth Legion. After engaging them with the mysterious tale, project and read the introductory information about Roman legions from this website. [https://rome.mrdonn.org/romanlegion.html](https://rome.mrdonn.org/romanlegion.html)

b. If time, let the students choose other links to project and read such as “Build a Roman Fort” or “The Roman Army.”

c. Ask students to discuss their thoughts about what they learned with a partner. (Grouping Options: Partners)

d. Reiterate the title of the lesson, *In Search of the Ninth*. Inform students that they will be doing some investigations in order to attempt to solve this mystery of what happened to the Ninth Roman Legion.

e. Emphasize the vocabulary pertinent to this lesson: empire, emperor, legion, and legionary. Share vocabulary cards with those students who would benefit from the visual images. (Scaffolding: Comprehensible input)

e. Ask the students if they were to travel to Rome this week, would they find the Roman army just
In Search of the Ninth

like it was in ancient times? (No) Discuss what things would have changed. Today’s soldiers:
• can be women
• can marry
• don’t have to be in the army for 25 years
• don’t use slingshots and bows and arrows
• don’t ride horses
• etc.
(Application: Linked to objectives)
f. End the session by having students work in groups complete the Ticket to Leave for Session One. (Assessment: Group, Written)

SESSION TWO
Explore:
 a. Ask students if they have ever watched a police or detective show on TV. Have students name some of the ones they have seen. (Preparation: Linking to background) (Application: Meaningful)
b. Share the remaining vocabulary terms for this lesson (forensics, impression, and interview). Distribute vocabulary cards with those students who would benefit from the visual images.
c. Tell students that today they will be doing investigations in an attempt to solve the mystery of the Ninth Legion.
d. Divide students into 4 groups and have each group complete a forensic activity: fingerprinting, footprinting, teeth impressions and forensic interviewing. Rotate all four groups every 15 minutes until the 4 groups complete the 4 activities. (Application: Promotes engagement, Hands On) (Grouping Option: Small groups)
e. Explain to students that in the next session they will analyze the data they collected in Session Two and then decide which of the 4 activities was the best way to solve the mystery. Then they will present their group’s opinion on what was the most helpful way to solve the mystery to the class. (Grouping Options: Small group)
b. Review what a written opinion would look like. (Scaffolding: Modeling)
c. Allow students time to work together to complete the task. Monitor progress to ensure that all students understand the assignment. (Scaffolding: Comprehensible input)

Evaluate:
a. Distribute and discuss the Forensic Activities Written Opinion Scoring Guide.
b Have each group compare their draft versions of their written opinions to the Written Opinion Scoring Guide so they are sure they have included all requirements. Remind students that they should introduce their opinion with the mystery they are solving, then include the evidence from the data they gathered, and be sure the vocabulary words presented in this lesson are in the opinion. (Assessment: Written) (Integrated Processes: Writing)

SESSION FOUR
c. When groups have their final copy of the written opinion completed, share the Oral Presentation Scoring Guide. Allow some time for groups to prepare their presentations. Remind students that each student must present an integral part of the report. Have each group present their opinions to the class. (Assessment: Individual and Small Group) (Integrated Processes: Speaking and Listening)

Assessment

Mastery will be considered:

Geography and social studies:
• 75% or higher on the 4 point Ticket to Leave for Session One.
ELA grades:
• 80% or higher on the Forensic Activities Written Opinion Scoring Guide.
• 75% or higher on the 4 point Ticket to Leave for Session Two.
• 75% or higher on Vocabulary Test.
• 75% or higher on the Oral Presentation Scoring Guide.
Science grades:
In Search of the Ninth

- 80% or higher on the Interviews investigation worksheet.
- 100% on Fingerprinting, Teeth Impressions, and Footprints investigation worksheets.

Extensions

1. Read The Eagle of the Ninth by Rosemary Sutcliff to the class and discuss the author’s perspective on what happened to the Ninth Legion.
2. Discuss Hadrian’s Wall and Hadrian’s reasons for having it built. Compare and contrast it to the Great Wall of China.
