Geography of Ancient Greece

At the same time that the Shang dynasty was ruling much of the Huang He River valley and the Egyptian pharaohs were building the New Kingdom along the Nile, another civilization was beginning, along the northeastern shores of the Mediterranean Sea. The civilization was that of the ancient Greeks.

In Greece, there was no great river carrying layers of fertile silt to create rich farmland. Instead of finding themselves in an environment provided by a river valley, ancient Greeks found themselves on a peninsula, a piece of land almost entirely surrounded by the sea, with a rocky landscape that offered few natural resources.

Ancient Greece was located on the southern European mainland. The modern-day country of Greece includes not only the mainland portion, but also includes hundreds of islands. The biggest of these islands is Crete, south of the mainland. Northeast of Crete is another large island called Rhodes.

Mountains and hills cover nearly three-fourths of Greece. Western Greece is the most mountainous, and there, travel by land is very difficult. The land is not very fertile, either, but farmers herd goats and sheep on the rugged hillsides.

Eastern Greece has more land suitable for farming. Some of these farmlands are on the peninsula of Attica. Attica also has excellent natural harbors, or sheltered places, for ships. Peloponnesus, a large peninsula southwest of Attica, is a mountainous region outlined by a thin area of fertile soil. Here can be found several rivers, but unlike rivers in Egypt or Mesopotamia, these rivers dry up in the summer.

The climate of Greece also presented a challenge for early farmers. Summers were hot and dry, and winters were wet and windy. Ancient Greeks raised crops and animals well suited to the environment. Wheat and barley were grown, and olives and grapes were harvested. The many hills and mountains provided shrubs to feed the herds of sheep, goats, and cattle.

Because farming didn’t produce huge surpluses, and travel across the terrain was difficult, the Greeks came to depend on the sea. People living near the Mediterranean, Aegean, and Ionian Seas became fishers, sailors, and merchants. Because of Greece’s location in the eastern Mediterranean, it was a perfect location for trade. Greek sailors were highly skilled and traveled as far as ancient Egypt to trade their products. Greek merchants competed with traders from other Mediterranean cultures. One of these cultures was the Phoenicians. Traders from all over were eager to exchange their goods for Greece’s olive oil, wool, and wine. Those who traded with the Greeks especially prized Greece’s olive oil. It added flavor to food, along with its usefulness as a lamp fuel and body lotion.

Those who traded with the Greeks especially prized Greece's olive oil. It added flavor to food, along with its usefulness as a lamp fuel and body lotion.
Name________________________

Answer the following questions based on your reading from Handout 1. Then put your answers into the Cause and Effect graphic organizer at the bottom of this page.

1. What physical features make up nearly three-fourths of Greece?
   ________________________________________________________________
   ________________________________________________________________

2. How does such an environment affect life there?
   ________________________________________________________________
   ________________________________________________________________

3. What effects did geography have on the ways ancient Greeks met their needs?
   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________

4. How did the limited amount of fertile (crop) land cause the Greeks to become sea traders?
   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________

3 Causes (Environment)  3 Effects (Lifestyle)
5. What physical features make up nearly three-fourths of Greece?

*Three-fourths of Greece is mountains and hills.*

6. How does such an environment affect life there?

The rugged, rocky, hilly landscape provided few natural resources for early people. Farmers herded goats and sheep on the hillsides. Land travel was difficult, so Greeks relied on the sea for travel.

7. What effects did geography have on the ways ancient Greeks met their needs?

The Greeks had to raise crops and animals suited to the hilly environment and the climate of hot, dry summers and wet winters. Their crops were wheat, barley, olives and grapes. Herds of sheep, goats, and cattle grazed on the shrubs on the many hills and mountains.

8. How did the limited amount of fertile land cause the Greeks to become sea traders?

*Because farming didn’t produce surpluses, the Greeks came to depend on the sea. People became fishers, sailors, and merchant traders. Greek sailors were highly skilled. Those who traded with the Greeks especially prized Greece’s olive oil.*
Vocabulary Practice

Make pictures to represent each vocabulary word in this lesson.

- sea
- natural resource
- mountains
- rocky
- islands
- fertile
You are a geographer and an expert on the Mediterranean area. Write a summary to explain to 6th graders how the geography of Greece influenced the ancient Greeks to become sea traders.

Your summary must:

_____ present the information clearly and be accurately organized.
_____ contain the main idea plus the most significant details.
_____ include examples of cause and effect.
_____ use your own words.
_____ write in the voice of a geographer.
_____ be punctuated correctly.
Fill in the blanks to with these words to summarize the article.

sheep  fertile  islands
sea     three- quarters (3/4)  natural resources
rocky  civilization  traders
goats   environment  mountains

At the same time that the Shang dynasty was ruling much of the Huang He River valley and the Egyptian pharaohs were building the New Kingdom along the Nile another ______________ was beginning along the northeastern shores of the Mediterranean Sea.

Greeks found themselves on a peninsula, a piece of land almost entirely surrounded by the ________, with a ____________ landscape that offered few __________ ___________. The modern-day country of Greece includes not only the mainland portion but also includes hundreds of ______________. Mountains and hills cover nearly ____________ ____________ of Greece.

The land is not very ______________ but farmers herd ________ and ____________ on the rugged hillsides. Eastern Greece has more land suitable for farming. Ancient Greeks raised crops and animals well suited to the ________________. The many hills and ____________ provided shrubs to feed the herds of sheep, goats, and cattle. Because farming didn’t produce huge surpluses, and travel across the terrain was difficult, the Greeks came to depend on the sea. ________________ from all over were eager to exchange their goods for Greece’s olive oil, wool, and wine.
Assessment Answer Key

At the same time that the Shang dynasty was ruling much of the Huang He River valley and the Egyptian pharaohs were building the New Kingdom along the Nile another ______ civilization__________ was beginning along the northeastern shores of the Mediterranean Sea.

Greeks found themselves on a peninsula, a piece of land almost entirely surrounded by the ___sea___, with a _____rocky___ landscape that offered few _natural___resources___. The modern-day country of Greece includes not only the mainland portion but also includes hundreds of ____islands_____.

Mountains and hills cover nearly _____three___ ____fourths___ of Greece. The land is not very _____fertile____ but farmers herd ___goats___ and ____sheep_______ on the rugged hillsides. Eastern Greece has more land suitable for farming. Ancient Greeks raised crops and animals well suited to the _____environment____. The many hills and ___mountains_____ provided shrubs to feed the herds of sheep, goats, and cattle. Because farming didn’t produce huge surpluses, and travel across the terrain was difficult, the Greeks came to depend on the sea. _______Traders__ from all over were eager to exchange their goods for Greece’s olive oil, wool, and wine.
