

**camouflage:** the ability to blend into an environment

<http://simple.wikipedia.org/wiki/Camouflage>

**environment:** the air, water, plants, and other things that surround you

<http://kids.niehs.nih.gov/>

**predator:** an animal that kills and eats another animal

<http://victoriafalls24.com/>

**prey:** an animal that is hunted for food

<http://www.psmicrographs.co.uk/>

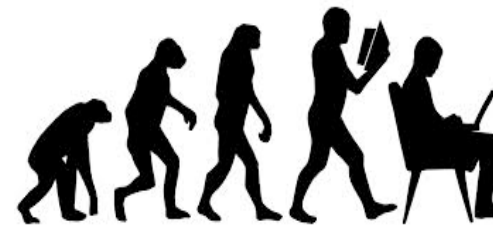

**natural selection:** the process by which plants or animals change in order to survive in their environment

**Natural selection, in a nutshell:**

<http://evolution.berkeley.edu/>

**evolve:** to slowly change
